

Course Outline

Course Code	RSM430 H1F
Course Name	Fixed Income Securities
Term, Year	Fall, 2024
Course Meets	LEC0101: Tuesdays, 9am – 11am LEC0201: Tuesdays, 11am – 1pm LEC0301/2001: Wednesdays, 9am – 11am
Web page URL	https://q.utoronto.ca

Instructor Details

Name	Email	Phone	Office Hours
Eric Kang	eric.kang@rotman.utoronto.ca	416-978-0414	TBA on Quercus

Course Description

This course on capital markets delves into the essential aspects of fixed income securities and markets. It emphasizes traditional bond and term structure concepts, pricing, interest rate risk measures, and hedging approaches. Additionally, the course covers corporate bond markets, including credit risk and capital structure, while also integrating discussions on current events and securities that impact market dynamics.

Learning Outcomes

By the end of this course, students will be able to:

- Describe and analyze fixed income securities, including their types, features, and pricing methods.
- Explain and analyze term structure concepts and how they apply to various market conditions.
- Assess and measure interest rate risk and its implications to fixed income assets.
- Evaluate corporate bond markets, focusing on credit risk assessment and capital structure implications.
- Analyze the impact of current events and emerging securities on the functioning of fixed income markets.
- Relate course concepts to real-world situations through case studies and current market analyses.

Course Prerequisites

Rotman Commerce: RSM332H1; Actuarial Science: ACT349H1

Course Materials

Required Readings

We will not be using a textbook in this course. The slides, associated case documents, and any other materials will be posted on Quercus as required readings.

Electronic Course Materials

Rotman Interactive Trader

The Rotman Interactive Trader is a market-simulator that provides students with a hands-on approach to learning finance. It allows students to practice decision making under uncertainty in a controlled environment where they can immediately observe the outcomes of their decisions. By being able to analyze the consequences of their decisions in different situations, students are able to learn how to make good decisions when the future is uncertain. More information can be found at <http://rit.rotman.utoronto.ca>.

Evaluation and Grades

Grades are a measure of the knowledge and skills developed by a student within individual courses. Each student will receive a grade on the basis of how well they have command of the course materials, skills and learning objectives of the course.

Work	Percentage of grade	Due Date
Midterm Test	20%	Week of Oct 7
RIT Case Performance	10%	Nov 12, 13 (in-class)
Decision Case Report (Group)	15%	11:59PM, Nov 24
Decision Case Q&A (Group)	10%	Week of Nov 25
Final Term Test	45%	TBD

Course Format and Expectations

RIT Decision Case Group Assignment: Report and Q&A

RIT Decision Case Assignment allows students to work in teams of **4 students**. Learning to work together in teams is a crucial transferrable skill you will use not only in your coursework, but also in your future careers. Support is available if you encounter common teamwork challenges such as:

- Team members feeling left out of the team.
- Team members not responding in a timely manner to communication.
- Division or quality of work among team members being unequal or unfair.

Consult the [Centre for Professional Skills Teamwork Resources page](#) for tips, strategies, and best practices. You can also [book an appointment with a teamwork mentor](#) through the RC Centre for Professional Skills Writing Centre. Teamwork mentors can help you resolve or mitigate conflict, strategize on planning, or improve team communication.

If you are a student registered with Accessibility Services, and extensions are one of your academic accommodations, consult with your Accessibility Advisor about the teamwork in this course.

The Group Assignment is designed to help you develop your communication skills. How well you communicate your ideas in writing will be considered in the evaluation of the assignment. In your written work, aim for clarity, strong organization, conciseness, professionalism, and correct grammar. Additionally, a Q&A session will be scheduled for each group to address questions related to the Decision Cases. More detailed information will be provided on the course portal.

Support is available through the RC Centre for Professional Skills (CPS) for students who would like help or feedback on their writing or speaking (to prepare for the Q&A session). CPS offers both individual and group appointments with trained writing instructors and presentation coaches who are familiar with the RC program and common types of business assignments. You can also access your college Writing Centres for help with written assignments.

You can [book an appointment with a writing or presentation coach](#) through the RC Centre for Professional Skills Writing Centre. For more information about writing centres, student supports, and study resources, see the [Writing and Presentation Coaching academic support page](#).

RIT Case Performance

RIT Case Performance provides an opportunity for students to gain hands-on decision-making abilities. Students will consistently apply their critical thinking to analyze problems presented using the RIT Case. They will also be required to translate their thinking into financial models that support real-time decision-making. For the RIT Case Performance, each student's performance over multiple simulation iterations will be computed to determine the overall individual grade. More detailed performance evaluation documents will be posted on Quercus.

Missed Tests and Assignments

Students who miss a term test or assignment for reasons entirely beyond their control (e.g. illness) may request special consideration **within 2 business days** of the missed midterm/test/assignment due date.

In such cases, students must:

1. Complete the Request for Special Consideration form: <https://uoft.me/RSMConsideration>
2. Provide documentation to support the request, eg. Absence Declaration from [ACORN](#), medical note etc.

Please note: As of September 2023, students may use the Absence Declaration on ACORN ***one time per term*** to report an absence and request consideration. **Any subsequent absence will require a [Verification of Illness form](#) or other similar relevant documentation.**

Students who do not submit their requests and documentation within 2 days may receive a grade of 0 (zero) on the missed course deliverable.

There will be **no make-up** for the RIT Case Performance. Students who miss the RIT Case Performance for valid documented reasons with an approval will have their grades re-allocated to their final exam.

Final Exams: If you miss the final exam in this course for a legitimate reason (illness, etc) you will need to contact your College Registrar to file a petition for a deferred exam. This deferred exam will be written at a later date as established by the Faculty of Arts & Science. Instructions

can be found here: <https://www.artsci.utoronto.ca/current/faculty-registrar/petitions-appeals/preparing-petition>

Late Assignments

All assignments are due on the date and at the time specified in Quercus. Late submissions will normally be penalized by 1% of the overall course grade if the assignment is not received on the specified date, at the specified time. A further penalty of additional 1% deduction will be applied to each subsequent day until the assignment is received or the allocated grade becomes zero as a result.

Statement on Equity, Diversity and Inclusion

The University of Toronto is committed to equity, human rights and respect for diversity. All members of the learning environment in this course should strive to create an atmosphere of mutual respect where all members of our community can express themselves, engage with each other, and respect one another's differences. U of T does not condone discrimination or harassment against any persons or communities.

Commitment to Accessibility

The University is committed to inclusivity and accessibility, and strives to provide support for, and facilitate the accommodation of, individuals with disabilities so that all may share the same level of access to opportunities and activities offered at the University.

If you require accommodations for a temporary or ongoing disability or health concern, or have any accessibility concerns about the course, the classroom or course materials, please [email Accessibility Services](#) or visit the [Accessibility Services website](#) for more information as soon as possible. Obtaining your accommodation letter may take up to several weeks, so get in touch with them as soon as possible. If you have general questions or concerns about the accessibility of this course, you are encouraged to reach out to your instructor, course coordinator, or Accessibility Services.

Plagiarism Detection

Normally, students will be required to submit their course essays to the University's plagiarism detection tool for a review of textual similarity and detection of possible plagiarism. In doing so, students will allow their essays to be included as source documents in the tool's reference database, where they will be used solely for the purpose of detecting plagiarism. The terms that apply to the University's use of this tool are described on the [University's Plagiarism Detection Tool FAQ](#) page from Centre for Teaching Support & Innovation.

Generative AI / ChatGPT

Students are allowed to make use of technology, including generative artificial intelligence tools, to contribute to their understanding of course materials as learning aids or to help produce assignments.

Any content produced by an artificial intelligence tool must be cited appropriately. Many organizations that publish standard citation formats are now providing information on citing generative AI (e.g., MLA: <https://style.mla.org/citing-generative-ai/>).

The use of generative artificial intelligence tools must be documented in an appendix for each assignment. The documentation should include what tool(s) were used, how they were used, and how the results from the AI were incorporated into the submitted work.

Academic Integrity

Academic Integrity is a fundamental value essential to the pursuit of learning and scholarship at the University of Toronto. Participating honestly, respectfully, responsibly, and fairly in this academic community ensures that the U of T degree that you earn will continue to be valued and respected as a true signifier of a student's individual work and academic achievement. As a result, the University treats cases of academic misconduct very seriously.

[The University of Toronto's Code of Behaviour on Academic Matters](#) outlines the behaviours that constitute academic misconduct, the process for addressing academic offences and the penalties that may be imposed. You are expected to be familiar with the contents of this document. Potential offences include, but are not limited to:

In papers and assignments

- Using someone else's ideas or words without appropriate acknowledgement.
- Submitting your own work in more than one course without the permission of the instructor.
- Making up sources or facts.
- Obtaining or providing unauthorized assistance on any assignment (this includes collaborating with others on assignments that are supposed to be completed individually).

On test and exams

- Using or possessing any unauthorized aid, including a cell phone.
- Looking at someone else's answers.
- Misrepresenting your identity.
- Submitting an altered test for re-grading.

Misrepresentation

- Falsifying institutional documents or grades.
- Falsifying or altering any documentation required by the University, including (but not limited to) medical notes.

All suspected cases of academic dishonesty will be investigated by the procedures outlined in the [Code of Behaviour on Academic Matters](#). If you have any questions about what is or is not permitted in the course, please do not hesitate to contact the course instructor. If you have any questions about appropriate research and citation methods, you are expected to seek out additional information from the instructor or other U of T or RC resources such as the RC Centre for Professional Skills, the College Writing Centres or the Academic Success Centre.

Email

At times, the course instructor may decide to communicate important course information by email. As such, all U of T students are required to have a valid UTmail+ email address. You are

responsible for ensuring that your UTmail+ email address is set up and properly entered on ACORN. For more information visit the [Information Commons Help Desk](#).

Forwarding your utoronto.ca email to a Gmail or other type of email account is not advisable. In some cases, messages from utoronto.ca addresses sent to Gmail accounts are filtered as junk mail, which means that important messages from your course instructor may end up in your spam or junk mail folder.

Recording Lectures

Lectures and course materials prepared by the instructor are considered by the University to be an instructor's intellectual property covered by the Canadian Copyright Act. Students wishing to record a lecture or other course material in any way are required to ask the instructor's explicit permission and may not do so unless permission is granted. Students who have been previously granted permission to record lectures as an accommodation for a disability are excepted. This includes tape recording, filming, photographing PowerPoint slides, Quercus materials, etc.

If permission for recording is granted by the instructor (or via Accessibility Services), it is intended for the individual student's own study purposes and does not include permission to "publish" them in any way. It is forbidden for a student to publish an instructor's notes to a website or sell them in any other form without formal permission.

Weekly Schedule

Session	Date	Topic	Readings
1	Sept 3, 4	Overview of the fixed income market, participants, bond features & structures	Lecture slides
2	Sept 10, 11	The Nominal Yield Curve & Interpolation	Lecture slides
3	Sept 17, 18	Building the Yield Curve: Government Bond Auctions & Repo Transactions	Lecture slides
4	Sept 24, 25	Understanding the Yield Curve: Spot Rates, Forward Rates, Bootstrapping	Lecture slides
5	Oct 1, 2	Measuring Interest Rate Risk: Duration, Convexity	Lecture slides
6	Week of Oct 7	Midterm Test	
7	Oct 15, 16	Corporate Bond Market: Credit & Capital Structure	Lecture slides
8	Oct 22, 23	Introduction to RIT and Fixed Income (FI) Cases: Fixed Income Case 5 (Yield Curve) and 6 (Credit Risk)	RIT Help files and FI case documents
No classes – Fall Reading Week			
9	Nov 5, 6	RIT FI Capstone case	RIT FI Capstone case documents
10	Nov 12, 13	RIT FI Case Performance	
11	Nov 19, 20	Embedded Calls & Puts Course review	Lecture slides
12	Nov 26, 27	RIT FI Case Group Q&A	

Please note that the last day you can drop this course without academic penalty is November 4, 2024.
