

Edward

Markham, Ontario

Specialist in Finance & Economics, Class of 2018

Why did I choose Rotman Commerce? I chose Rotman Commerce because when I got to meet current students and visit the campus, I felt that I fit here better than I did at any of the other campuses I had visited.

What do I do outside of class? I play Intramural Hockey and Captain an Intramural Soccer team. I am also actively involved in campus groups within Rotman Commerce and at the University level.

What surprised me most about Rotman Commerce? The amount of support you can find from peers, upper year students, and alumni.

What is my advice to incoming students? Get involved in something you are passionate about and really get yourself out there during your first couple of years. University is about so much more than just school.

My highlight at Rotman is two subsidized trips to New York City to participate in one of the largest student run finance conferences in the world.

My favourite non-Rotman Commerce course was LTE199 – First Year Seminar on Biotechnology and Society, completely irrelevant to what I studied, but it was very interesting to be in a small class setting with a research professor.

The best thing about Toronto is the food, and the variety of activities to do when you have free time.

The best thing about the University of Toronto is residence life in first year.

My favourite place to eat on or around campus is Yasu, it's pricey but definitely worth the experience.
